

ALCOHOL GEL

Alcohol Gel is an Anti-Bacterial hand cleaner without the need for water. It has been formulated using humectants that put back the moisture alcohol cleansers can remove from the skin. Alcohol Gel hand sanitiser is ideal for healthcare workers, childcare workers and food processing facilities.

DIRECTIONS FOR USE

Apply to your hands and rub briskly until dry. Use without water.

Alcohol Gel contains 60% alcohol to kill bacteria and sterilise hands. It also contains humectants to counteract and replenish moisture from the skin due to constant use.

Alcohol Gel is fragrance free, so it won't taint food flavour, making it ideal for food processing facilities

SAFETY NOTES

Alcohol Gel is a flammable product and must not be used around naked flames or sources of ignition. Empty containers are still flammable and should be rinsed out with water prior to disposal. Discontinue use if irritation occurs.
