AMFREE CLEAR

Amfree Clear is a solvent based cleaner with excellent soil solubility properties. It is designed to effectively clean glass, mirrors, stainless steel, vinyl, fabric, laminex and painted surfaces. Amfree Clear is ammonia and colour free making it safe to use on mirrors and tinting, and won't leave any harsh unwanted smells.

DIRECTIONS FOR USE

WINDOW AND GLASS Amfree Clear is applied undiluted to the surface by spray or cloth and wiped with a new, dry, oil-free cloth to leave surface super clean. If any smearing becomes evident, then change the cloth.

CARPETS Spray undiluted over soiled areas. Brush towards the centre of the stain with a clean brush. Mop up foam and soil with dry cloth. Brush pile to restore new carpet appearance. Avoid walking on carpet whilst it is wet. Always pre-test for colour transfer before using product.

JEWELLERY

Soak jewellery in Amfree Clear for 20 minutes then gently brush and rinse with clean water to restore it to its original brilliant lustre, returning the "new look" to the stone and settings. Caution should be exercised when cleaning costume jewellery or stones held in place with adhesive.

SAFETY NOTES

Amfree Clear contains mild solvents that could damage some plastics such as acrylic. Where possible test the surface before major application.
