

Changing the Way the World Cleans with SAO

Who are Tersano?

The company develops and manufactures devices that produce Stabilised Aqueous Ozone (SAO) – the simplest, safest, most sustainable way to clean and sanitise.

How does it work?

Patented SAO (Stabilised Aqueous Ozone) is a highly effective cleaning agent that breaks down dirt, grease and other contaminants, safely replacing traditional chemical cleaners, deodorisers and sanitisers. This means no more storing, mixing or disposing of traditional chemicals. It also provides no harm to the body if ingested or consumed.

It works in 3 easy steps –

1. Inside both products, oxygen from the air is safely turned into ozone then infused into ordinary cold tap water.
2. As the treated water moves through the product, sensors monitor the system to ensure the water has been infused with the correct level of O₃. Ozone is attracted to germs, soils and bacteria and quickly eliminates contaminants it comes in contact with.
3. The Lotus® PRO system works for hours to fill larger cleaning equipment to clean commercial spaces and the iClean Mini produces hundreds of sprays once charged, for smaller areas.

What are the benefits?

SAO makes a working environment safer, happier and healthier by providing the following:

PEOPLE

- Protects people with allergies or sensitive skin from the harsh effects of chemicals
- Kills 99.9% of germs – including E.coli, Salmonella, Listeria – without chemicals
- Improves health & safety (SDS 0-0-0)
- Promotes a healthier working environment
- Harmless to eyes or skin if accidentally splashed

PROFIT

- Drastically reduces inventory of multiple chemicals, cleaners, sanitisers, and deodorisers
- All-in-one solution decreases labour time and improves productivity
- Savings versus conventional cleaners (litre to litre)
- Fewer sick days due to reduced chemical exposure
- Meets Sustainability Initiatives

PLANET

- Reduction of carbon footprint
- Harmless to the environment as oxidising solution reverts back to water and oxygen

Where can SAO be used?

All surfaces can be cleaned with one cleaning product.

Tersano Lotus Pro is ideal for:

- Flooring, Hardwood, Tile, Vinyl Surface
- Carpet
- Concrete, Terrazzo & Stone
- Bathroom & Kitchen Counters
- Glass, Mirrors, Stainless Steel, Chrome Surfaces
- Showers, Bathtubs, Toilets, Sinks
- Handrails, Escalators, Elevators
- Shelving, Desks, Tables, Chairs
- Lab Equipment
- Appliances
- Fruits & vegetables

iClean Mini is ideal for:

- Appliances
- Cutting Boards
- Glass, Mirrors, & Windows
- Stainless Steel & Chrome Surfaces
- Handrails, Escalators & Elevators
- Concrete, Terrazzo, & Stone
- Bathroom & Kitchen Counters
- Showers, Bathtubs, Toilets, Sinks
- Shelving, Desks, Tables, Chairs

What is the difference between Lotus Pro and the iClean Mini?

iClean Mini

The iClean Mini is so simple to use for a complex and effective product by the press of a button:

CHARGE: Simply charge for 1 hour and it will last for hundreds of sprays!

FILL: Using cold water only, fill the product through the QuickRelease reservoir.

SPRAY: Finally, press the power button to release oxidising solution.

CARTRIDGES

Use SAO mini cartridges to improve cleaning performance by 15% over aqueousozone (AO) alone.

- **Filters minerals in tap water**
- **Easy-to-use: install and replace in seconds**

Single pack of cartridges lasts a year

Lotus Pro

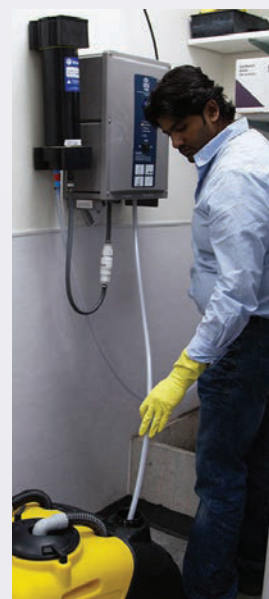

The Lotus Pro is ideal for commercial use, producing many litres of SAO at the press of a button. Simply switch on, wait for the light to go green and start filling! SAO can be used to fill buckets, spray bottles, steamers, scrubber dryers and most other cleaning equipment.

CARTRIDGES

CARTRIDGE	SAO-4 Model #LCA114K-FB	SAO-24 Model #LCA118K-FB
Sanitizing Time	Up to 4 hrs	Up to 24 hrs
Cleaning Time	Up to 3 days	Up to 6 days
Cartridge Life	6,000 litres ¹	3,000 litres ¹

The Lotus Pro is available with a choice of Series I and Series II stabilisers. The Series I creates SAO which remains effective as a sanitiser for up to 4 hours and as a cleaner for up to 3 days and produces 6,000 litres before requiring replacement.

The Series II creates SAO which remains effective as a sanitiser for up to 24 hours and as a cleaner for up to 6 days and produces 3,000 litres before requiring replacement.
