FRAID

Fraid is a final rinse aid for domestic and industrial dishwashers. It is a highly active wetting agent which incorporates a low foaming, non-ionic surfactant with solvent and souring agent to eliminate residual alkalinity from the wash cycle. The product will assist in the removal of spotting and streaks, thus dishes, cutlery and glass will come out of the dishwasher dry and sparkling clean.

DIRECTIONS FOR USE

For directions, refer to the dishwasher manufacturer instructions manual on how to use rinse aid in your automatic injector.

SAFETY NOTES

Fraid can cause serious eye irritation. Avoid contact with the eyes and ensure proper handling procedures are followed to avoid spills. For further information refer to the Safety Data Sheet.
