PRODUCT

AN ENVIRONMENTALLY RESPONSIBLE AID TO MICROFIBRE TECHNOLOGY

Not all 'green' cleaning products are truly environmentally responsible as advertised. Peerless JAL chemists have spent many years researching and sourcing environmentally responsible cleaning agents to formulate an exceptional cleaner that is truly green. The Research and Development team at Peerless JAL have developed the only complete environmentally responsible cleaning package on the market today. Each possible area of improvement has been explored to reduce the carbon footprint of the user.

This includes:

- ***Truly green chemicals***
- ***The use of microfibre technology resulting in less chemicals and water used.***
- ***Specialised environmentally responsible packaging for the reduction in plastics used to minimize land fill and carbon footprint.***
- ***Super concentrated chemicals to reduce transport of water resulting in reduced carbon emissions***
- ***100% recyclable Packaging***

Microlaund Microfibre Laundry Detergent has been specifically designed to wash and prolong the effective life of your microfibre. This product has been formulated using the newest 'green' technology on the market. Environmentally responsible surfactants and builders work together to soften the water and enhance the cleaning efficiency of Microaid Microlaund by deactivating water hardness minerals. Microlaund has been formulated and packaged in a Super Concentrated format to maximize cost savings and minimize environmental impact. It contains an anti re-depositing agent which aids in preventing loosened soil from re-depositing onto the microfibre cloth, resulting in reduced future washing time and consumption of laundry liquid.

A green natural acid is added for cleaning and sanitisation of Microfibre cloths. The cleaning action of the natural acid is effective and safe as it attacks a broad spectrum of bacteria without damaging or degrading the minute capillaries of your microfibre while sanitising.

Packed in 1Lt soft, recyclable packaging, Microaid Microlaund can be diluted as 20ml in 5Lt ml for general wash or 40ml in 5Lt of water for heavy duty wash.

FEATURES AND BENEFITS

- Super Concentrated: 20ml in 5Lt
- Small packaging: easy to handle, quick dilution technique.
- Environmentally responsible: non toxic and non corrosive.
- Non-dangerous
- Free of Chlorine, Phosphates and Volatile Organic Compounds.
- Biodegradable: safe for aquatic and bird life.
- Sanitizer: Contains natural acid which works as a surface sanitizer.
- Reduces wash time: Microlaund contains an anti re-depositing agent that shields the surface after cleaning and reduces the settling of dirt in the Microfibre cloth.
- Newest technology on the market: 'Green' wetting agent and surfactant will promote efficient spreading and surface coverage of Microlaund cleaner on your Microfibre to promote quicker wash time.
- Recyclable packaging: Microaid Microlaund is packaged in 100 % Recyclable material.
- Not tested on animals

TECHNICAL INFORMATION

Description:	Microaid Microlaund Microfibre Laundry Detergent
Appearance:	Orange clear liquid
pH:	8.00 – 9.00
Odour:	Light Soft and Fresh Fragrance
Specific Gravity:	1.01 ± 0.02
Clarity:	Clear
Classification:	Causes skin irritation. Causes serious eye damage DG Class – None allocated
VOC Content:	No VOC
Degradability:	Biodegradable

DIRECTIONS FOR USE:

For general use dilute 20ml of Microlaund Microfibre Laundry Detergent with 5Lt of water.

For heavy duty washing dilute 40ml of Microlaund Microfibre Laundry Detergent Cleaner with 5Lt of water.

SAFETY: Causes skin irritation. Causes serious eye damage.

Keep out of reach of children. Read label before use. Wash hands, face and all exposed skin thoroughly after handling. Wear protective clothing, gloves, eye/face protection and suitable respirator.
