

## RETRIM

Retrim is a highly efficient, ready to use product which finishes in a high to medium high gloss giving all surfaces that as new look. It penetrates dry and weathered surfaces lubricating and restoring the material.

Retrim is suitable for use on vinyl, wood, leather, fibreglass, upholstery, moulded sun shields, bumper bars, tyres and rubber trim.

### **DIRECTIONS FOR USE**

Retrim is supplied ready for use.

For severely dirty applications it is advised to pre clean the surface first with an appropriate Sampson cleaner before applying Retrim.

Spray, swab or brush Retrim over the clean surface and allow to soak for up to one hour allowing deep penetration into the surface

Wipe off any remaining residue with a clean cloth

Avoid applying Retrim to the car windscreen.

Be particularly careful of overspray from a trigger sprayer. If accidentally applied, remove with clean cloth and methylated spirits before coating dries. Retrim should not be used on floors or car foot pedals

### **SAFETY NOTES**

Retrim is not considered a poison or hazardous according to workplace provisions. For further information consult the Safety Data Sheet.
