SPECIALIST CARPET CLEANING CHEMICALS SINCE 1981

## CITRUS SPECIAL SONISTEAM

### PRODUCT DESCRIPTION

CITRUS SPECIAL SONISTEAM is a yellowish green liquid with an attractive blended citrus odour. It is biodegradable, and makes use of the solvent d'Limonene. This natural solvent is potent cleaner, distilled from the skins of citrus fruits.

CITRUS SPECIAL SONISTEAM has been designed as a premium product for hot water soil extraction cleaning of carpets and conforms with the Australian Standard AS3733. It is very effective and safe for the operator, the carpet, all carpet cleaning machines and the environment.

### DIRECTIONS FOR USE

#### **As a Spotter**

It is diluted at 1 part with 3 to 5 parts water and then applied with a hand sprayer, agitated and extracted.

#### **As a Prespray**

CITRUS SPECIAL SONISTEAM is diluted in water generally at rates between 1 in 10 and 1 in 40 depending on:

**Machine Power** – more powerful machines can clean with less detergent.

**Quantity Applied** – the amount applied to an average house may vary depending on the technique and preference of the cleaner.

**Degree of Soiling** – extremely dirty carpets may require more prespray or stronger solutions.

#### **Use in the Extraction Tank**

When cleaning heavily soiled commercial carpets or when using some low-pressure extraction machines it may still be necessary or desirable to use detergent in tank as well as prespraying. In this case the in tank rates generally vary between 1 in 100 and 1 in 300 depending on the type of machine and the nature of the work.

If operator preference is to use detergent in tank only with no prespray we recommend that CITRUS SPECIAL SONISTEAM should be used in tank at 1 in 50.

### Safety Notes

CITRUS SPECIAL SONISTEAM can have a drying effect on the skin. Always protect the eyes from detergents. If splashed in the eyes, flush with clean water for 10 minutes and seek medical attention if irritation persists. For full safety information, refer to SDS.
